

**Release 38.1.0.2**

The *PostalOne!* system Release 38.1.0.2 (August 28, 2014) deployed to introduce software fixes to the system. This includes correction to issues previously identified in a prior release.

These Release Notes provide the contents of the release and affected subsystems.

<b>1. ELECTRONIC DATA EXCHANGE .....</b>	<b>1</b>
1.1. Mail.dat .....	1
1.2. Mail.XML .....	1
<b>2. ELECTRONIC VERIFICATION SYSTEM (EVS) .....</b>	<b>1</b>
2.1. Postage Statement Processing .....	1
2.2. Scan Based Payment (SBP) .....	1
<b>3. POSTAGE STATEMENT PROCESSING .....</b>	<b>1</b>

*PostalOne!* Release 38.1.0.2 deployed on August 28, 2014 to introduce software fixes to the system. This includes corrections to issues previously identified from a prior release.

## 1. Electronic Data Exchange

### 1.1. Mail.dat

The Mail.dat MDX is adequately processing update jobs that create consolidated postage statements. A *PostalOne!* Server error 7024 is thrown during postage statement processing when an update job is submitted that creates an additional Master or Consolidated postage statement in the mailing. The first update was passing, however the second update job failed. 4978

### 1.2. Mail.XML

The support for FAST Mail.XML version 10.0 has been restored. Previously, mailers had been unable to make an appointment for FAST using Mail.XML 10.0. 4971

## 2. Electronic Verification System (eVS)

### 2.1. Postage Statement Processing

The eVS system landing page is now being properly updated when creating multiple short paid adjustment records for a given mailer, month, year, and mail class. This was affecting mailers who did not have a postage adjustment factor for the affected mail class (i.e., their manifested postage is 1%-4% less than the postage of the sampled pieces) and none of the short paid adjustments were finalized. 4932

### 2.2. Scan Based Payment (SBP)

Priority Mail prices are now applied. Previously, finalization of postage for SBP mailings was not properly applying the rate surcharge type to match the new Priority Mail rates. 4959

## 3. Postage Statement Processing

Commercial Plus Pricing (CPP) Priority Mail permits configured for PS 3600PM, line A21 (Permit Reply Mail Flats) were not being correctly calculated. This issue will be resolved in this patch. 4981

Hardcopy and Postal Wizard submission of Commercial Plus Pricing (CPP) Priority Mail mailings (PS 3600PM) will now process mailings with non-identical weights. Previously, PS 3600PM CPP did not apply to mailings with non-identical weights; separate statements had to be submitted with identical weights each. 5000
